

RECYCLING DROP-OFF SITE EXPANSION

The City of St. Louis has a goal to increase the number of recycling drop-off locations citywide.

OBJECTIVE

To increase the amount of clean recyclables from city residents.

PROCESS

Use the guidelines below to identify potential sites for new recycling drop-off locations. Suggestions will be evaluated by the City.

GUIDELINES

Site Size and Requirements

- There must be room for a minimum of 3 recycling dumpsters.
- Trucks must be able to access the dumpsters and drive away easily.
- Check above for any overhead obstacles. Wires, trees, etc. can prevent drivers from emptying dumpsters.
- The area must be safe to drive up, park and place recyclables in the dumpsters.

*Public property locations preferred.

*Parks are not an option due to dumping issues.
